Release: May 26, 2021

ATTENTION

“Support for Overseas Travelers with Low-Cost PCR Testing & Rest/Lodging”

Tokaido Shinagawa-shuku works with community to offer “best last stay in Lodge Town”

As of Wednesday, May 26, 2021, Guesthouse Shinagawa-shuku, operated by SHUKUBA JAPAN (1-22-16 Kita-Shinagawa Shinagawa-ku Tokyo CEO Takayuki Watanabe) has teamed up with “Idogojusanji Clinic” to offer emigrating foreign travelers pre-departure support with “PCR Testing & Negative Result Certification + free rest/budgeted lodging.”

### A “Modern Lodging Town” on the Tokaido Road

Guesthouse Shinagawa-shuku was founded in 2009 as a lodging facility for backpackers. Our interactive stays encourage community involvement, and have gained popularity among foreign travelers. We have welcomed over 10,000 guests a year from over 60 different countries.

After March 2020 due to the effects of the COVID-19 pandemic, our income dramatically fell, and even though numerous emergency states have been declared in Tokyo, due to lodging being excluded from government-mandated shut-downs, we have remained in business.

In May 2020, a number of foreigners within Japan faced difficulty in returning to their home countries due to economic circumstances caused by COVID-19. In response, Guesthouse Shinagawa-shuku began free lodging support for such individuals, and we have hosted over 200 free stays.

The nearby Idogojusanji Clinic has given PCR tests to a number of foreign travelers despite a lack of multi-lingual support and issues in delivering results to those without a fixed address within Japan. By combining the medical services offered by the Clinic with the global hospitality experience and physical space provided by the Guesthouse, we are able to offer a free waiting area and budget lodging for those waiting for test results. We help lower the “economic hurdles” for these travelers and welcome them to spend their last bit of time in Japan comfortably in a “modern lodging town”.
